

# **Project Report**

Date	18 November 2022
Team ID	PNT2022TMID31896
Project Name	Global Sales Data Analytics

## **1. INTRODUCTION**

### **1.1 Project Overview**

Shopping online is currently the need of the hour. Because of this COVID, it's not easy to walk in a store randomly and buy anything you want. So, try to understand a few things like, Customer Analysis and Product Analysis of this Global Super Store. It has 51291 Rows and 24 Columns.

### **1.2 Purpose**

To create data visualization charts like those mentioned below:

1. Column Graph Showing Sales, Quantity and Profit By Segment.
2. Pie Chart Showing Sales By Order Priority and Sales.
3. TreeMap showing Sales for Sub-Category Hierarchy and Bar Graph showing Sales By Region.
4. Geographical Map showing Top-10 Country-Wise Sales coloured by Region.
5. Line Graph Showing Profit and Sales By Sub-Category.
6. Bullet Chart Showing Sales Analytical Values Across Different Sub- Categories
7. Scatter Plot showing Sales by Profit with points for Sub-Category.
8. Line Graph showing Regional Sales Forecast.
9. Line Graph showing Sales and Profit for Month\_Order
10. Box Plot showing Sales Sub Category with Segment Key.
11. Sales Bullet Chart By Ship Mode
12. Geographical Map for Showing Top-10 Countries By Sale
13. Radar Graph for showing Regional Sales By Segment

14. To Create Word Cloud for Country-Wise Sales a Bar Graph for Sales By Region.
15. Summary Graph for Sales,Profit,Quantity and Discount and a Bar Graph for Sales By Sub-Category.

## 2 LITERATURE SURVEY

### 2.1 EXISTING PROBLEM

- If we are finding unusual patterns within our data analysis or our statistical significance is not strong enough, we might not have enough data to make valid conclusions
- Data is meaningless without context and without context, we cannot turn data into information
- Without doing data analysis, we won't get the opportunity to evaluate the data before making actionable plans
- Information is useless without being able to apply to something

### 2.2 REFERENCES

REFERENCES	AUTHORS
Predictive Sales Analytics	<ol style="list-style-type: none"> <li>1. Johannes Habel Associate Professor of Marketing University of Houston</li> <li>2. Sascha Alavi, Professor of Sales Management and Chair of the Sales Marketing Department University of Bochum</li> <li>3. Nicolas Heinitz Research Associate University of Bochum</li> </ol>
Data Analytics	<ol style="list-style-type: none"> <li>1. Nada Elgendy , University of Oulu.</li> <li>2. Ahmed Elragal, Research Associate</li> </ol>

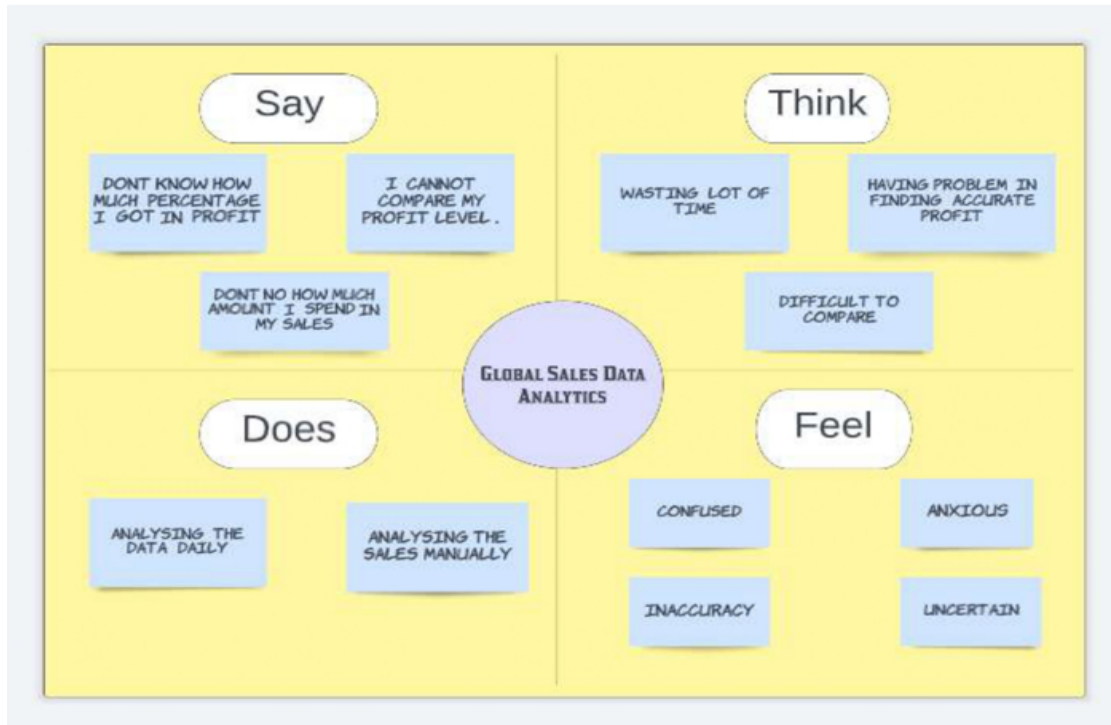

Top-down Data Analysis with Tree maps	<ol style="list-style-type: none"> <li>1. M. Tennekes, Research Associate Research Associate</li> <li>2. E. de Jonge, Associate Professor of University of Houston</li> <li>3. Jian Pei Research Associate University of Bochum</li> </ol>

## 2.3 PROBLEM STATEMENT

Data that includes a large array of metrics is known as sales data, but broadly speaking, if you can measure something that relate to the sales process. Software such as IBM cognos, which help to collect the data and helps to analyse the performance. It is important to know to learn to read that data to understand that what means for business and where to improve. With right sales analysis tools and wealth of information, we can able to spot the current trends that will empower the organization to provide better sales forecasts and goals for the rest of the organization.

### 3. IDEATION & PROPOSED SOLUTION

#### 3.1 Empathy Map Canvas

#### 3.2 Ideation & Brainstorming

Step-1: Team Gathering, Collaboration and Select the Problem Statement

**Template**

## Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

⌚ 10 minutes to prepare  
🕒 1 hour to collaborate  
👥 2-8 people recommended

**➕ Before you collaborate**

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⌚ 10 minutes

- 1 Team gathering**  
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
- 2 Set the goal**  
Think about the problem you'll be focusing on solving in the brainstorming session.
- 3 Learn how to use the facilitation tools**  
Use the Facilitation Superpowers to run a happy and productive session.

[Open article](#) ➔

**1 Define your problem statement**

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⌚ 5 minutes

**PROBLEM**

The goal is to compare the sales in terms of profit and loss of an organization to review their strategies and performance to make improvements. One way to measure performance with sales analytics

## Step-2: Brainstorm, Idea Listing and Grouping

2

### Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil icon to directly turn to edit drawing

#### Vishnu Karup

#### Vishnu Surya

#### Vishnu S

#### Taril Selvan S

#### Jagadeesh S

3

### Group Ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your board.

**4**

**Prioritize**

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

30 minutes

### 3.3 Proposed Solution

Project team shall fill the following information in proposed solution template

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Shopping online is currently the need of the hour. Because of this COVID, it's not easy to walk in a store randomly and buy anything you want. So, try to understand a few things like, Customer Analysis and Product Analysis of this Global Super Store.
2.	Idea / Solution description	Using IBM Cognos , we can analyze the previous year sales data analysis and we could predict the sales pattern for the future good extend.
3.	Novelty / Uniqueness	Focusing on the data will provide most valuable and important information that will be useful to predict the future sales pattern. Once you've incorporated sales data analysis into your pipeline, you can begin moving on to metrics that suit the more bespoke challenges you face.
4.	Social Impact / Customer Satisfaction	A MNC companies and huge organization can predict the sales pattern to determine their performance in terms of profit and loss in the future.

5.	Business Model (Revenue Model)	This could cost with less expensive . Data science and a gadget is needed to develop this. If developing an app with some extra facilities may cost some charges.
6.	Scalability of the Solution	Investors, Financers and Business Organizations.

### 3.4 Problem Solution Fit

Define CS, fit into CC	<b>1. CUSTOMER SEGMENT(S)</b> <span>CS</span> A Business person who would like to measure their performance in global sales	<b>6. CUSTOMER CONSTRAINTS</b> <span>CC</span> <ul style="list-style-type: none"> <li>To pay close attention to first-time buyers</li> <li>Understanding the behaviours, preferences, affinities etc...</li> <li>No online payments available. Buy directly from us.</li> </ul>	<b>5. AVAILABLE SOLUTIONS</b> <span>AS</span> <ul style="list-style-type: none"> <li>Properly tracking sales data is available for successful sales forecasting.</li> <li>The competition perform analytics and display dashboard with autogenerated insights.</li> </ul>	Explore AS, differentiate
	<b>2. JOBS-TO-BE-DONE / PROBLEMS</b> <span>—</span> <ul style="list-style-type: none"> <li>To collect relevant data.</li> <li>To manage time properly</li> <li>To manage the sales pipeline correctly</li> </ul>	<b>9. PROBLEM ROOT CAUSE</b> <span>RC</span> <ul style="list-style-type: none"> <li>Business model</li> <li>Marketing Teams</li> <li>Educational Institution</li> <li>Society</li> </ul>	<b>7. BEHAVIOUR</b> <span>BE</span> <ul style="list-style-type: none"> <li>Analyze the findings</li> <li>Locate buying centers in existing accounts.</li> <li>Collecting sales data and analyzing using offices software.</li> </ul>	

<b>3. TRIGGERS</b> <span>TR</span> <ul style="list-style-type: none"> <li>To increase the business strategies</li> <li>Loss in Business</li> <li>Trying to challenge opponent companies</li> </ul>	<b>10. YOUR SOLUTION</b> <span>SL</span> <ul style="list-style-type: none"> <li>Creating an Interactive Dashboard.</li> <li>Properly tracking sales <u>data is</u> available for successful sales forecasting.</li> <li>Analyzing order priority and shipment details, to compare the performance</li> </ul>	<b>8. CHANNELS of BEHAVIOUR</b> <span>CH</span> <b>8.1 ONLINE</b> Using third party services with automated insights and subscription based services to analyze data. <b>8.2 OFFLINE</b> Using office software to analyze complex data in un-intuitive way.
<b>4. EMOTIONS: BEFORE / AFTER</b> <span>EM</span> <b>Before</b> : Lazyness, difficulty to manage the data, confusion, anxiety, distress. <b>After</b> : Easiness to manage data, lot of time, clear mind, peacefulness		

## 4 REQUIREMENT ANALYSIS

### 4.1 Functional Requirement

Following are the Functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through form Registration through email SignUp/SignIn
FR-2	User Confirmation	Confirmation via registered email.
FR-3	User Login	Login via email and password .
FR-4	Uploading Dataset	Upload dataset in Cognos analytics tool
FR-5	Visualize and analysing data	Creating different visualization such as line chart, pie chart etc... to analyse the dataset
FR-6	Creating Dashboard	Create graphs, tables, charts etc...
FR-7	Log out	Logout after downloading the Dashboard

### 4.2 Non-Functional Requirements

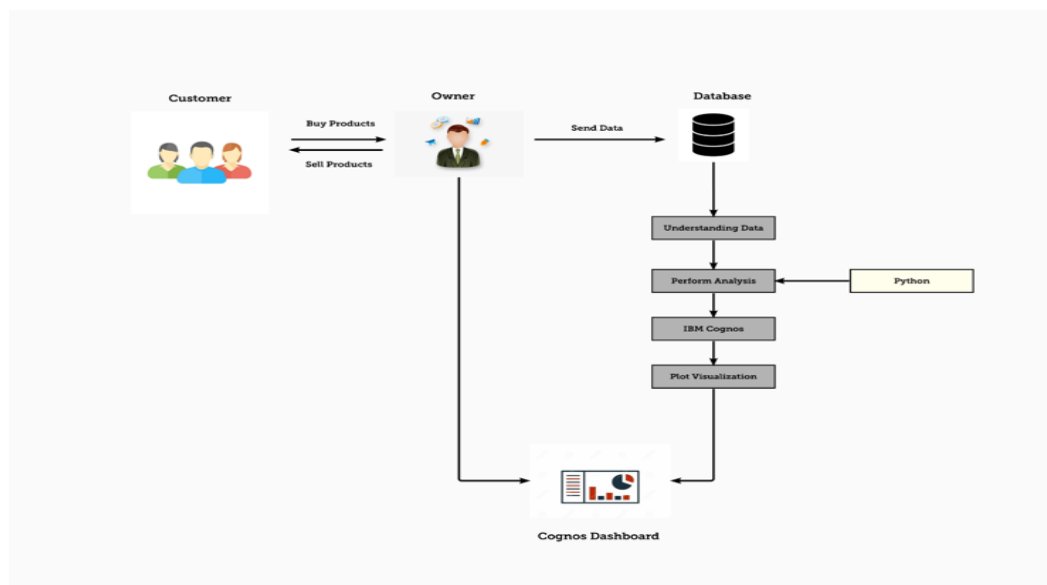

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	<b>Usability</b>	Optimized resources and the user can access the dashboard till it has the right store sales dataset.
NFR-2	<b>Security</b>	It is securable. Anyone with correct login credentials only can view the dashboards.
NFR-3	<b>Reliability</b>	Based on development, it is highly reliability.
NFR-4	<b>Performance</b>	Performance and efficiency levels are high. User can easily drag to any functions which they want to visualize.

NFR-5	<b>Availability</b>	Available to all users who wants to know about the sales data in all websites. It is free of cost.
NFR-6	<b>Scalability</b>	Dashboards are very scalable and user can modify the metrics of the dashboard whenever they want.

## 5. PROJECT DESIGN

### 5.1 DATA FLOW DIAGRAMS

### 5.2 Solution & Technology Architecture

## 5.3 User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail		Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password		High	Sprint-1
	Dashboard	USN-6	As a user, I can create a visualization by using the dashboard in the application.		High	Sprint-3
Customer (Web user)	Login	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account dashboard	High	Sprint-1
Customer Care Executive	Chat box	USN-2	It can be used by easily access and responsible	I can access by easily through application	High	Sprint-2
Administrator	Calling	USN-3	It can be used by easily access and responsible	I can access by easily through application	High	Sprint-2

## 6 PROJECT PLANNING & SCHEDULING

### 6.1 Sprint Planning & Estimation

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	USN-1	user can register for the application by entering my email and password	3	High	VISHNU KURUP
Sprint-1		USN-2	User will receive email if the registration is successful. That the registration has conformed	3	High	VISHNU SURYA P
Sprint-1		USN-3	As a user, I can register by any browser.	5	Low	TAMILSELVAN S
Sprint-1		USN-4	As a user, I can extract data	3	Medium	JAGATHESH S
Sprint-1	Login	USN-5	As a user, I can log into the application by entering email & password	6	High	VISHNU S
Sprint-2	Dashboard	USN-6	I can access the dashboard of mine.	3	Medium	JAGATHESH S
Sprint-2		USN-7	I can register for the application through any web browser.	5	Low	VISHNU SURYA P
Sprint-2		USN-8	I can use my credentials. For accessing <a href="#">my resources</a> .	2	High	VISHNU S
Sprint-2		USN-9	As a user I can schedule events and set events.	7	High	VISHNU KURUP
Sprint-3	Support	USN-10	I can perform analysis by tools (IBM Cognos)	10	Medium	TAMILSELVAN S
Sprint-3		USN-11	Responds to user queries via telephone, email etc.	3	Medium	VISHNU SURYA P
Sprint-3		USN-12	The team must respond immediately to the queries based on the priority	5	High	TAMILSELVAN S
Sprint-4	System Requirements	USN-13	Hardware Requirement 1. Laptop or PC • i5 processor system or higher • 4 GB RAM or higher • 128 GB ROM or higher 2. Mobile (12.0 and above)	5	Low	VISHNU KURUP
Sprint-4		USN-14	Software Requirement 1. Laptop or PC • Windows 10 or higher Android Studio	8	Medium	VISHNU SURYA P

## 6.2 Sprint Delivery & Schedule

### Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	17	05 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	18	12 Nov 2022
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	13	19 Nov 2022

#### Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

## 7. CODING & SOLUTIONING (Explain the features added in the project along with code)

## 7.1 Feature 1

Global superstore dataset is required data set for our data analytics. Using analytical visualizations in IBM Cognos Analytics tool required dashboard, report and story has been created. Kaggel API has been . Purpose of external API has been used in the application. IBMDB2 database is used for uploading the dataset to the cloud database for performing basic sql operations and then connected to IBM cognos analytics platform. Open source frameworks has been used for embedding the dashboard , report and story using HTML and Bootstraps.

## 7.2 Feature 2

**Code :**

```
<!DOCTYPE html>

<h3>One way to measure performance is with sales analytics</h3>

<p>

Global Sales covers all activities involved in selling a product or service to a consumer or business. It is important for sales and marketing teams to review their strategies and performance in order to make improvements. Sales data analytics refers to the use of technology to collect and use sales data to identify actionable insights. It is used to identify, optimize, and increase sales. An efficient sales model that generates higher revenue for the business.

```

## 8. RESULTS

### **8.1 Performance Metrics**

- Greater visibility
- Measurable
- Easy to understand and predict
- Timesaving Efficiency
- Better for decision making
- Better for forecasting

## **9. ADVANTAGES & DISADVANTAGES**

### **Advantages:**

- **Enhanced Visibility:** Dashboards provide greater visibility with information available whenever it is required to ensure businesses are better placed to respond to changing market conditions.
- **Timesaving Efficiency:** With dashboards, we are no longer wasting valuable time generating reports from multiple systems. Instead, data is drawn from a source and displayed as an easy to interpret visual overview .
- **Better Forecasting:** With greater insight into the data, future demand can be more accurately predicted using historic information. Businesses can be more effectively planned for demand fluctuations, setting measurable goals and deliverables for greater success.
- **Better Decision Making:** Whether you're providing reporting and analysis for the entire organisation or functional areas of the business, a dashboard allows companies to analyse key data quickly and meticulously. Visualised interactivity serves to deliver overwhelming amounts of data in a way that is easy to understand. With the ability to easily identify what the data really means; better decisions can be made relevant to the business.

**Disadvantages:**

- Flashy or cluttered design, with users attempting to incorporate too much information without understanding constraints or considering their specific needs from the range of different measurables detailed data analysis provides.
- The technology used in the development of dashboards differs from other software solutions already employed in organisations and can be initially difficult to understand.
- The business has no predetermined rules and hierarchies for how dashboard metrics are used. This means each employee can use the metrics in different ways, resulting in a diverse set of data being reported.

**10. CONCLUSION**

From this project, we have successfully,

- Created multiple analysis charts / graphs .
- Used the analysed chart for creation of dashboard .
- Used the analysed chart for creation of report and story.
- Saved and visualized the dashboard, report and story in web application using HTML and bootstrap.

**11. FUTURE SCOPE**

Sellers make websites where they display images of their products with price and description. Shoppers who buy the products have multiple payment options like COD, e-wallet, net banking, credit card, and so on. Online sellers have the responsibility of shipping the product to the buyer and ensuring safe and timely delivery. Various charts can be prepared like regarding Year\_Order and Day\_Order Columns, Market and Shipping Costs Columns, country and state wise sales column, segment wise price column, order priority wise shipping mode and shipping cost, city wise profit and sales columns etc...can be visualized. Interactive dashboards can be created with more number of visualization. User friendly and interactive web application can be created with latest technology for different type of datasets.
